

Icon Energy System (Shenzhen) Co., Ltd. as one of the subsidiaries of Highpower Group, was established in 2011. It is a national high-tech enterprise based on the R&D, design and manufacture of power systems for Ni-MH batteries and lithium-ion batteries. It also provides clean energy solutions centered on energy storage.

The company's products are widely used in consumer electronics, smart homes, handheld devices, vacuum cleaners, portable medical equipment, garden tools, light electric vehicles, household energy storage and other applications.

The company has strong technical strength and is equipped with complete equipment and systems dedicated to power system testing. Icon Energy, which strictly adheres to the industry's highest standards, also attaches great importance to standardized production management and is equipped with professional and automated packing production lines at the same time. In addition to the ISO13485:2016 certification, Icon has successively passed relevant international certifications in terms of quality, safety, technology, environment, region and social responsibility, such as ISO9001:2000, ISO14001:2004, QC080000 system certification as well as CE, UL, PSE and other product certifications. Icon Energy has been recognized by the industry for its vibrant strength and excellent product quality. The company will continue to organize production management in strict accordance with the requirements of the international management system, continuously improve internal management and control, and strive to achieve faster, better, and more sustainable development!
